TITLE	📀 On Video	
Cold bitumen mechanical applicator		
ARTICLE		
Eliminating many of the hazards connected to the heating and applying of hot bitumen was the challer National Contracting set itself. The main concerns arose from sealing joints on road surfacing contract workers walked backwards to distribute hot bitumen from a watering can Œ hazards included manual tripping, fire and occupational health due to the posture of the worker.	ts, where	
Following extensive tests and the correct permissions, the company now uses cold bitumen and has developed application procedure. The safety of its application has also advanced with a mechanical applicator. A miniatu compressor forces the bitumen down a discharge pipe and onto the joint.
