TITLE

Preventing unauthorised ladder access

ARTICLE

For sites still using vertical access ladders, an example of effective prevention of unauthorised access has been demonstrated by Tarmac Northern™s Concrete & Mortar Yorkshire.

L where there is no access to the rear of the ladder, a sheet steel door, vertical hinged, is closed across the face of the ladder and padlocked

L where there is access to the rear, a sheet steel housing is attached to the rear of the ladder, in addition to the steel door at the front.
