TITLE

Mobileye collision prevention system

ARTICLE

Description

Colas has installed a collision prevention system. Mobileye operates using unique computer vision based technology to detect vehicles and lane markings. The driver receives both visual and audible alerts if the vehicle deviates from the lane or comes too close to the vehicle in front. The system also gives the driver a distinct forward impact warning. The latest Mobileye system also has pedestrian and cyclist warnings.

Benefits

- Reduces the risk of accidents, serious injury or death
- Reduces costs related to incidents, driver down time and personal injury claims
- Helps the company and drivers manage their duty of care for others
- Helps drivers develop safer driving techniques
- Positive driver feedback
- Better safety performance when benchmarked against industry standards
- Gold and Highly Commended RoSPA awards for Managing Occupational Road Risk
- Intend to link the system to onboard telematics to identify drivers with excessive alerts.
