Haul Truck Fatality

WHAT HAPPENED

On November 3, 2018, a 44-year old shift supervisor with 3 years of experience was killed when a loaded Caterpillar 785B haul truck ran over her pickup truck at the crusher site.

The US Mines Health and Safety Administration has issued an initial safety alert which can be found at https://www.msha.gov/data-reports/fatality-reports/2018/fatality-15-november-3-2018/fatality-alert

NG POINTS /	

Operators should take the opportunity to review their systems/procedures and ensure that they remain effective.
