TITLE

Innovative and affordable conveyor guarding solution

ARTICLE

Entry 21174 Finalist Fatal 1 and 4

At Hanson's Chipping Sodbury Quarry it was decided that the conveyor systems should be fully enclosed to achieve the best protection for employees and contractors on-site and to minimise the environmental impact of dust and noise.

The solution used was designed to be the safest, lightest, simplest mechanism that could be adjusted with standard tools, was robust, long lasting, and economical. It can be fitted anywhere, and it will help the industry to keep people safe.
