COUNTRY OF ORIGIN:	United Kingdom		

TITLE
<b>Improved lorry washing facilities</b>
ARTICLE
<p>Description</p> <p>MQP recognised that drivers required a safer method of washing their vehicle bodies rather than a ground based hose which encouraged potentially unsafe behaviour and created muddy and slippery conditions.</p> <p>A small 'safer by design' working group comprising of franchise drivers, the transport manager and operations developed a solution which has been implemented. The result is a better drained area, improved hard standing and a wash out platform erected to direct water into the vehicle body.</p> <p>Benefits</p> <ul style="list-style-type: none"><li>• Removes risk of falls from height due to driver climbing on vehicle body</li><li>• Eliminates slip and trip hazards from inadequately drained area and trailing hose</li><li>• Increased visibility to allow drivers to see and wash inside the lorry body in safety</li><li>• Eliminates possible entrapment by reducing the need to raise the vehicle body</li><li>• Cleaner working environment</li><li>• Engagement of drivers and others in developing a solution enhances safety culture.</li></ul>
